INSTRUCTIONS AND EXPLA	NATIONS FOR FILLING THIS FORM

and Article on Notice of Intention.)

This form shall be made out in duplicate and shall be accompanied by a filing fee of \$10.00. If the application is to enlarge an existing project or to amend a permit, fill out this form to cover only the enlarged or amended portion, then

- Section 1. This section to be filled out by the State Engineer.
- Section 2. Fill in the name and address of the applicant.
- Section 3. If the applicant is a corporation, company or firm, fill out blanks under section three. Give date of filing certificate of incorporation with the Corporation Commission.

Section 4. The quantity of water to be appropriated for irrigation purposes should be stated in acre-feet delivered on the land. The amount to be used wholly or in part by direct diversion shall be noted after (a); that to be used wholly or in part by storage, after (b). Under (c) give any additional information necessary to properly state or define the use.

Important: Except in the case of flood water projects, no direct diversion to the freigated lands may be made at a rate greater than 1 second foot for each 70 acres. In no case may a right be acquired for more water than can be bene-

- Section 5. Each blank under this section shall be filled out.
- Section 6. In a direct diversion project, or in the case of diversion to an off-channel reservoir, the point of diversion is the location of the canal headgates on the bank of the stream or water-course. If water is to be stored behind a dam across the stream itself, the point of diversion then becomes the location of the outlet gates from the reservoir.

If the point of diversion lies on unsurveyed lands, it should be described as nearly as possible by legal subdivision "as projected" from the nearest accepted government survey.

Section 7. State all the purposes for which the water is to be used. If for "Irrigation and Domestic Use" state under (a) the total number of acres to be irrigated; under (b) the location of lands to be irrigated. If for "Manufacturing, Mining, Power, or Like Purpose", fill out the statements under that heading. If water is to be used for several purposes, fill out

Section 8. Give here any additional data necessary to describe the proposed works or old works to be amended or en. larged hereby.

Section 9. Give references of a bank and merchant with whom applicant does business or to whom he is known.

Claimant shall sign affidavit to above statements before a Notary Public or other proper official qualified to administer oaths.

Note: If additional space is necessary, use a separate sheet of paper and attach securely hereto.

QUALITY PRESS-BANTA PE

13.	length of canal filing maps accompanying this ap Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	pplication. m: Maximum height a feet; maximum slope of upstream face. n of spillway crest feet; width of spillway. der full head feet. Area of Water Surface, Acres	reeboard (above high cubic feet per secon Storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet d: size and character of outlet cubic feet per second
13.	length of canal filing maps accompanying this and Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	phication. In Maximum height of feet; maximum slope of upstream factors of spillway crest feet; width of spillway. Ber full head frial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet d: size and character of outlet cubic feet per second
13.	length of canal filing maps accompanying this and Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	pplication. am: Maximum height a feet; maximum slope of upstream face n of spillway crest eet: width of spillway der full head brial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet cubic feet per second
13.	length of canal filing maps accompanying this ap Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spillway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	phication. Am: Maximum height a feet; maximum slope of upstream face. The of spillway crest feet; fe	storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet d: size and character of outlet cubic feet per second
13.	length of canal filing maps accompanying this ap Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spillway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	pplication. am: Maximum height a feet; maximum slope of upstream face n of spillway crest eet; width of spillway der full head rial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet cubic feet per second
13.	length of canal filing maps accompanying this and Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	phication. In Maximum height of feet; maximum slope of upstream face. In of spillway crest feet; width of spillway. Ber full head frial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ce paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet; cubic feet per second
13.	length of canal filing maps accompanying this application of crest length of storage defect; length of crest length of crest length of canal length of crest l	pplication. am: Maximum height a feet; maximum slope of upstream face n of spillway crest eet; width of spillway der full head rial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet cubic feet per second
13.	length of canal filing maps accompanying this ap Hydraulic properties of storage de length of crest crest width	phication. In Maximum height of feet; maximum slope of upstream face. In of spillway crest feet; fee	storage Capacity, Acre Feet	cee paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet; cubic feet per second
13.	length of canal filing maps accompanying this and Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	phication. In Maximum height a feet; maximum slope of upstream face. In of spillway crest feet; width of spillway. Iter full head frial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ce paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet; cubic feet per second
13.	length of canal filing maps accompanying this ap Hydraulic properties of storage de length of crest crest width	pplication. am: Maximum height a feet; maximum slope of upstream face. an of spillway crest feet; feet; width of spillway. Ber full head frial, etc. Area of Water Surface, Acres	storage Capacity, Acre Feet	ce paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet; cubic feet per second
13.	length of canal filing maps accompanying this and Hydraulic properties of storage de length of crest crest width feet; slope of downstream face feet; elevation of outlet conduit discharge capacity of spiliway conduit discharge capacity of outlet und type of dam, construction mate Elevation or Depth Above Outlet	pplication. am: Maximum height a feet; maximum slope of upstream face. an of spillway crest feet; feet; width of spillway. Ber full head frial, etc. Area of Water Surface, Acres	Storage Capacity, Acre Feet	ce paragraph 14 feet; feet; feet; elevation at crest of dam feet; elevation of flow line water line at maximum spill) feet; cubic feet per second

14. Additional data or explanations The water will be diverted at several points along the San Juan River below Navajo Reservoir - the exact points of diversion.
description of diversion dams, hydraulic properties of conveyance works and
storage dams, and estimated costs will be furnished by supplemental application for each use after each contractor for water has finalized his plans
for the construction of his works.
15. Estimated costs: Main canal or conduit
Total cost
16. Time required to begin construction See paragraph 14.
time required to complete the works
time required to fully apply water to beneficial use
I, applica
being first duly sworn, upon my oath, depose and say that I have read the foregoing statements and that the same are true to the best of my knowledge and belief the Interior Bureau of Booleanthan
Acting Regional Director, Region h
Subscribed and sworn to before me this 12 of
(Notary Public)
My commission expires April 1970 (Notary Public) SEE ATTACHMENT
ENDORSEMENT OF STATE ENGINEER
Number of this filing 3215
Recorded in Book (Page) 3215
Notice of Intention No. 3215 received August 28, 1967
Formal Application receivedDecember 16, 1968
It is haroly asknowled a to a constant
It is hereby acknowledged that the attached application for the
diversion and beneficial use of 500 cubic feet per second of water
from the natural flow of San Juan River and its tributaries down-
stream from Navajo Reservoir, including seepage and return flows,
has been submitted in compliance with Section 75-5-31, New Mexico
Statutes Annotated, 1953 Compilation.
Witness my hand and seal this <u>17th</u> day of December
A.D., 1968.
